

We Go **Beyond the Report.**

When you refer your clients to us, they get more than a thorough inspection – they get **organized next steps, trusted resources, and support** through the most stressful part of the transaction to help your buyers move toward closing on time and with confidence.

What Your Clients Get When They Work With Us

After the inspection, buyer questions don't stop – and too often those questions land on you. We've built support into our process so your clients have trusted resources when they need them.

- **Insurance:** Buyers can request a connection with a vetted, trusted provider selected for their property and location – not sent to multiple companies competing for their information.
- **Home Warranty:** Coverage options for systems and appliances, right when buyers need them.
- **Home Security:** Solutions presented at the moment buyers are thinking about protecting their new home.

Homebuyers will be able to view Fixle Protection Products inside their Client Portal after receiving their inspection report.

Your Clients Are Protected. So Is Your Relationship.

Every service is fully opt-in. Buyers must actively request information before any provider contacts them. No mass outreach. No data distribution. You remain the trusted advisor throughout the transaction.

**Supported buyers.
Easier closings.**

Fewer Questions on Your Plate

95% of agents report helping buyers with tasks outside their core role – from insurance to contractors to repair estimates.¹ When your clients work with us, that burden gets lighter.

Trusted Partners, Not a Lead Marketplace

When buyers request a connection, they're matched with one vetted, trusted provider selected for their property and location. One point of entry. No bidding wars. No chaos.

Value That Extends Past Closing

Confident, supported buyers remember who guided them – and who referred them to the right inspection company.

¹ Spectra 2026 Agent Survey. Survey conducted among U.S. real estate agents regarding post-inspection transaction needs.
